Great news that KEDA SUREMAKER is now a EAACA member!

The European Autoclaved Aerated Concrete Association was created in 1988 to promote the interests of producers of AAC and their national associations. These years EAACA and its members have made great contributions to the AAC industry, focusing on sustainable development, health and safety, ensuring the competitiveness of AAC industry, calling for reducing carbon footprint, and launching urban transformation campaign to rebuild urban environment.

KEDA SUREMAKER, as a leader from China AAC industry and the vice president of China Aerated Concrete Association, is deeply moved by the scientific research attitude and open mind of EAACA. This year we are honored to announce that we have become a member of EAACA, and we hope to strengthen experience exchange in the future and promote the development of the world's AAC industry together with EAACA and friends from all over the world.
