

# GRUPPO STAMPLAST: ALL *form*, ALL COLOURS, ALL EFFICIENCY.

Producing in Italy to be competitive in the world.

Founded in 1995 with its head office in Francavilla Fontana (Italy, province of Brindisi) Gruppo Stamplast is a group of companies leader in production and commercialization of mainly plastic based and metal goods for the construction industry, furthermore building equipment and tools.

Our strength is lying in offering complete “Made In Italy” quality, but at the same time cost-efficient solutions for channeling, water management, tiling and ventilation, roofing, completed with working tools and labor safety equipment.

The production cycle of the goods manufactured by Gruppo Stamplast is starting with the raw material, by the production of the polymer granules in the site of Rieti, which is also assuring a large independence for the manufacturing of the final goods, making us nondependent of third party raw material providers.

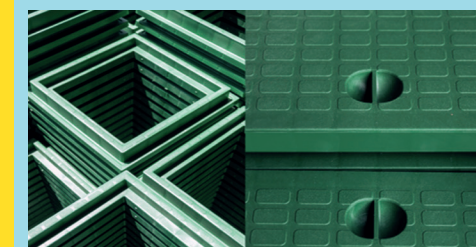

A second, very important part of the process is the design and prototyping of the new products, to which we put a high accent following our idea to not only provide quality and durable products, but also goods carrying the best

traditions of Italian design and style, even in construction. The final design and mold production is following, each finalized mold being inserted in the mold park, currently containing more than 600 products, which were made successively in a continuous serial in establishments specialized in molding and extrusion.

Besides plastic based products (or completing plastic products), our group of companies shows also significant results and a huge experience in the design and production of metal products, from the processing of coils, to slicing up the profiling and providing cast iron channel gratings and covers. In the end the production cycle finishes with the customization and packaging, to which we also pay a special attention, assuring that our goods are reaching the customer unharmed, and efficiently packed according to European standards.

Thanks to advanced logistic services and an own fleet of trucks, Gruppo Stamplast is able to convey the products to all the major distributors on the domestic market, also providing outstanding logistic services for its international customers, transporting to 35 countries worldwide.

We produce today in 6 plants throughout Italy, all performing modern, quality certified and efficient manufacturing. Storage capacities of more than 50,000 square meters covered and 100,000 m2 uncovered deposits efficiently complete the production process.

Being a leader in our sector on the Italian market, our sales activity is more and more concentrated to export sales, providing already solutions for customers in many foreign countries, and through AG Sales, the sales specialized member company of our group, we continuously develop our search for local distributors and sales partners worldwide.

Gruppo Stamplast through its members directly produ-

ces the majority of its products and also imports auxiliary accessories for providing complete solutions. Our goods are sold on one side through distributors and wholesalers to the market, on the other side directly to industrial project management and installation companies. All these allow us an always flexible and outstanding value on pricing strategy for each market.
