AiVISION

Very good cost effective price per video stream analytics: SaaS/Edge Computing

Analytics for Security

Security companies with multiple video streams can identify anomalies and get overall analytics much more accurately than humans watching every stream. Analytics for Safety Regulations Identify if the workers were or not safety helmets.

Analytics for Safer City
Identify GUNS and VIOLENCE.

Analytics for Petroleum/Security industry
Identify FIRE in open spaces/large indoor spaces.

Analytics for OOH

OOH display advertisers can identify and measure audience in real time.
For Advertisers allowing CPM, time on ad pricing, and potentially retargeting Analytics for Smart City Identify, localize and measure what, where, when and how things move in the streets, open spaces or indoor spaces. Identify traffic flows and congestions. City planners can design better cities for people, bicycles, wheelchairs, strollers, and more.
